

WALNUT

(Coarse, Medium And Fine)

LOST CIRCULATION MATERIAL

A lost circulation material of ground **Walnut** is available in three grades, fine, medium, and coarse; ranging in size from 100 mesh to 6 mesh.

Used as a lost circulation material or bridging agent due to its granular nature. **Walnut** is chemically inert and may be added to any mud system.

Walnut is also used as a drag reducer in deviated holes. When circulated past the tight hole section immediately prior to a trip, the irregular particles are embedded in the filter cake and act as bearings to reduce the hole drag.

PHYSICAL PROPERTIES:

Appearance: Tan, granular or flour-like solid
Specific Gravity: 1.2-1.4

MIXING & HANDLING

As a cure for lost circulation, mix **Walnut** into the mud or in a lost circulation pill in concentrations of 10.0-30.0 kg/m³. It is advisable to use a dust mask and eye protection while mixing all powdered products.

WHMIS: Not controlled

TDG: Not regulated

Packaging: 50lb sack
